

Ruling coalition tables offshore drilling bill with Parliament

The ruling coalition on Friday tabled in Parliament a bill on offshore drilling.

"We have tabled the offshore drilling bill in Parliament today as leaders of the coalition. The bill unfreezes investment in the Black Sea and reduces dependence on Russian gas, giving Romania a chance to become a regional leader and giving Romanians access to cheaper gas," national leader of the Social Democratic Party (PSD) in the ruling coalition Marcel Ciolacu wrote on Facebook.
