

Order on distribution of potassium iodide tablets published in Official Journal

The order regarding the distribution modality of the potassium iodide medicine, 65 mg tablets, to the population was published in the Official Journal.

"Within 7 days from the entry into force of the order, the county health directorates and the Bucharest Municipality's health directorate will transfer 65 mg potassium iodide tablets to, with the support of drug distribution companies," the Ministry of Health said.

In order to get the 65 mg of potassium iodide tables, the citizens will go to the family doctor, who will issue a medical prescription, based on which the pharmacies will provide the tablets that belong to them.

According to the order, the tablets will be distributed free of charge to the population by the pharmacies. Their list is available on the website of the Ministry of Health, in the section "Potassium iodide distribution campaign": <https://www.ms.ro/campanie-distributie-iodura-de-potasiu/>.

Information on the correct use of 65 mg potassium iodide tablets will be available free of charge in pharmacies.

Potassium iodide tablets should be administered only in the event of a nuclear incident, as directed by the authorities.
